Dear friends and customers,

I am pleased to present my new catalogue. Most of my book stock was gathered in the last 20 years and contains many rare and seldom offered items. I hope you will find something of interest in this catalogue, otherwise I am in the position to search any book you find difficult to obtain. Please send me your want list. I am always interested in buying books, journals or even whole libraries on all fields of science (zoology, botany, geology, medicine, archaeology, physics etc.). Please offer me your duplicates.

Terms of sale and delivery:

We accept orders by mail, telephone, fax or e-mail. All items are offered subject to prior sale. Please do not forget to mention the unique item number when ordering books. Prices are in Euro. Postage, handling and bank costs are charged extra. We are required to charge our EU customers 6% VAT (TVA, BTW) unless they possess a VAT registration number and live outside of the Netherlands (please quote your VAT number when placing orders!). Books are sent by registered surface mail (unless we are instructed otherwise) upon receipt of payment. Confirmed orders are reserved for 30 days. If payment is not received within that period, we are in liberty to sell those items to other customers. If you pay by cheque we have to add € 10,- bank charges. Return policy: Books may be returned within 7 days, provided we are notified in advance and that the books are well packed and still in good condition. Full refund.

Catalogue Entomology Books No. 12 (November 2017)

Entomology (Arachnids)

EA26957 **ANDRÉ, M., 1946.** €25,00

Faune de France 46. Halacariens marins; 152 p., 265 figs, paperbound (original printed covers). A very detailed and well-illustrated study. Deals with Porohalacaridae and Halacaridae, includes some new nominal taxa. Uncut and unopened. A very good clean copy.

EA27938 **ANONYMOUS,, 1928.** €20,00

Arachnida. British Spiders. London, The British Museum of Natural History; Collection of loose-leaved (14.0 x 9.0 cm), full colour (post)cards, and a 4 page text, all in one pictorial envelope.

In 1922, the British Museum (Natural History) started issuing a series of postcard and greetingcard sets; in the early years usually consisting of five full-colour cards relating to one zoological subject, and some descriptive text. This series was continued at least to the year 2003, when the 299th set was published (for a complete list, see <http://www.nhm.ac.uk/research-curation/library/archives/catalogue/>). Because of the ephemeral character of these attractive and scientifically correct illustrations, these early cards have become quite rare. Here we offer two parts (cards numbered 2-10). The first card missing, and the cards of the second part (nos 6-10) added (but not the text). All cards are nice and clean.

- EA26973 **AUDOUIN, J. & H. MILNE-EDWARDS, 1829.** €220,00
Résumé d'entomologie, ou d'histoire naturelles des animaux articulés. Tome Premier. Histoire naturelle des annélides, crustacés et arachnides. Contenant une esquisse de l'organisation, des caractères, des moeurs et de la description de ces animaux; précédé d'une introduction historique, et suivi d'une biographie, d'une bibliographie et d'un vocabulaire; Two parts in two. xii, 252, 24 p., 48 engraved plates, frontispiece, small 8vo (12.5 x 8.2 cm), paperbound (original printed covers).
This is a rare part of the "Encyclopédie portative", a series of pocket-sized books under the direction of C. Bailly de Merlieux. The plate section has its own pagination, title and half title. The work deals with annelids (plates I-VIII), crustaceans (plates IX-XXXVII), Arachnida (plates XXXVIII-XLV) and Myriapoda (plates XLVI-XLVIII). Bookblock of the text part split, covers soiled, printed paper cover of spines partly perished, some text pages a bit spotted, plates mostly clean. In all a fairly good set of this rare work. Nissen ZBI, 474.

- EA27165 **DUGÈS, A.L. & H. MILNE EDWARDS, 1836.** €250,00
Le règne animal distribué d'après son organisation, pour servir de base a l'histoire naturelle des animaux, et d'instruction a l'anatomie comparée. Les arachnides; 106 p., 31 plates [numbered 1-28, 19A, 19B, 20bis], mostly hand-coloured, 4to, contemporary half morocco over marbled boards. Spine with four raised bands, floral gilt compartments and title. Marbled endpapers. All edges gilt.
In this copy, the text and atlas are bound in one. It deals with spiders, mites, ticks, and scorpions, as well as with the Pycnogonida. Boards somewhat rubbed. Pages 105-106 (Table méthodique) are bound in front. Text pages with scattered foxing, plates somewhat less so, but a few are rather age-toned. Rare
- EA27166 **DUGÈS, A.L. & H. MILNE EDWARDS, 1836.** €62,00
Le règne animal distribué d'après son organisation, pour servir de base a l'histoire naturelle des animaux, et d'instruction a l'anatomie comparée. Les arachnides; 106, 54 p., contemporary [publisher's?] half morocco over marbled boards. Spine with four raised bands, floral gilt compartments and title. Patterned endpapers. Top edge gilt.
The text parts of the arachnids (by Dugès and Milne Edwards), and the annelids. The atlases were published separately and are not included. Usually this work is listed under Cuvier, who died four years earlier. In fact this work was entirely (re)done by his "disciples". Of this binding we have seen several examples which suggest that this edition of "Cuvier" was on sale pre-bound. Text pages of the arachnids mostly clean, only some scattered marginal spotting; those of the annelids often age-toned. In all a rather good copy in a very good binding.

 On the variations in the internal anatomy of the Gamasinae, especially in that of the genital organs and their mode of coition; 44 p., 4 lithographed plates, large 4to, paperbound (original printed covers).
 A well illustrated paper on then poorly known mites, also showing the whole animals in great detail. A good clean copy. Rare.
- EA27526 **MICHAEL, A.D., 1901-1903.** €60,00
 British Tyroglyphidae; Two parts in two. xv, 293, xi, 183 p., 42 [1: A-C, I-XIX; 2: XX-XXXIX] lithographed plates of which 28 tinted or finely coloured, original blind-tooled cloth with gilt title on spine and gilt vignette on front board.
 A thorough study on these Acari with fine illustrations. Some antiquarians claim that all plates are coloured, or that there are more than 42 plates but that is quite certainly incorrect. Ex library set with several small stamps, on plate versos and several in text leaf margins. Plate rectos, however, clean, no foxing, and bindings sound.

Het bloedvatenstelsel en de nephridia der nemertinen; [4], 114, [4] p., 3 large, folded lithographed plates (two in chromolithography), original embossed cloth with gilt title on the spine and front board. Thesis.
A very special copy of the thesis of the Dutch zoologist Anthonie Cornelis Oudemans (1858-1943), the world's leading acarologist in the first half of the 20th century. His thesis, however, is on Nemertines (a wormlike group of animals). This copy comes with on the half-title the hand-written, signed and dated dedication to his father, the renowned astronomer J. A. Oudemans. Includes a hand-written, signed letter of Oudemans (on a postcard) addressed to the Dutch cetaceologist Anton Boudewijn Van Deinse (1880-1965), and a typescript copy of a letter to Van Deinse, acknowledging the importance of this copy, most probably by Oudemans' biographer, G. L. van Eyndhoven, as well as an autographed letter by Van Deinse to Van Eyndhoven, about this copy of Oudemans' thesis. The funeral card of Oudemans, issued by his family, is tipped in on the first blank verso, a newspaper clipping (obituary), and another newspaper clipping (recording that Oudemans received a high Dutch decoration) on the half-title. Text and plates a bit spotted, Van Deinse's signature in the margin of the front free endpaper and first blank, otherwise very good, clean. Van Eyndhoven, lijst der opera, 12.

 Araneologie oder Naturgeschichte der Spinnen nach den neuesten bis jetzt unbekanntent Entdeckungen vorzlich in Rücksicht auf die daraus hergeleitete Angabe atmosphärische Veränderungen; vi, 122 p., 20th century marbled boards.
 Rare first German translation from the second 1797 French edition (first edition: 1795) of this curious work spread all over Europe in translations and shorter versions in various journals in the early 19th century. Denis-Bernard Quatremere Disjonval (1754-1830) was a notorious French chemist. He went to Holland, but was imprisoned in Utrecht for his bizarre ideas. In this period he learned to predict the weather by studying spiders and their cobwebs and predicted cold weather when Utrecht was besieged by the French in the winter of 1795. The prediction was smuggled from the prison to the French general who then decided to wait until the waters froze and when they did, marched on the ice and captured the city. He then released the araneologist. Two old stamps on title page verso, title page with some marginal repairs. In the rear a three pp. list of other works published by Varrentrap and Wenner. Bonnet, "Bibliographia araneorum" only mentioned the French edition. Cat. BM(NH), p. 1627.

Ueber den innern Bau der Arachniden; [3], 48 p., 5 engraved plates, later blind half calf over marbled boards, spine with five raised bands.
Rare publication on arthropods, in particular scorpions and spiders. Neither in Horn-Schenkling, nor in Hagen. This is most likely all that has been published. Gottfried Reinhold Treviranus founded the famous Zeitschrift für Physiologie in 1824 and published his "Vermischte Schriften" (1816-21). This small monograph was published on behalf of the Physikalisch-medicinischen Societät in Erlangen, and probably also published in their Abhandlungen. Some light foxing in the text and an old waterstain in the lower inner corner of the last text pages and plates. Nissen ZBI, 4168.

EC27832 **COLEOPTERA, COLLECTION OF PAPERS, 1874-1945.** €320,00

Collection of over 115 papers on Coleoptera; In 5 volumes. Over 2000 p., 12 plates (2 coloured), numerous text figures, 8vo (1 volume small 4to), uniform green cloth with leather labels on the spines. Each label contains the names of the families included.

A fine collection, neatly bound, of French papers on Coleoptera from many great specialists. A total of over 115 offprints on Histeridae, Silphidae, Lioidae, Cuculidae, Tritomidae, Endomychidae, Dryopidae, Cleridae, Buprestidae, Throscidae, Lagriidae, Phipiphoridae, Melandryidae, Meloïdae, Cerambycidae, Dasytidae, Hordellidae, Chysomelidae, Carabidae, Dystiscidae, Staphylinidae, Elateridae, Cucurlionidae, etc. by many authors such as Schmidt, Pasquet, Reitter, Berthe, Houlbert, Théry Müller, Holdhaus, Pic, Laboissière, Rey, Reyerimhoff, Jeannel, Paulian, and others. A few are signed. Most papers are rather small but of taxonomic importance and therefore often difficult to find. One volume is somewhat larger and contains papers that were printed in a larger format. A nice, well bound set.

Later green buckram with gilt title on spine. Original printed wrappers bound in rear.
 A curious thesis on phosphorescence or light in insects by Raphael Dubois, who discovered and named luciferine and luciferase. A nice feature of this thesis is formed by the graphs of the light emitted during flight. The mounted portrait of Paul Bert (1833-1886), a photo from the 1860's or 70's, is somewhat of a mystery. This French physiologist, politician, and diplomat, was founder of modern aerospace medicine. He found that an animal illness at high altitudes caused mainly by the low oxygen content of the sparse atmosphere. Bert also made a study of "the bends", suffered by deep-sea divers coming up too quickly to the surface from the great pressures of the depths. Apparently Dubois admired Bert, who died earlier that year. Some worming to the hinges, a few text pages spotted. Signed and dedicated to A. Copperhorn on the front wrapper. In all a good copy.

 Recherches anatomiques sur les carabiques et sur plusieurs autres insectes coléoptères. Paris, Bechet Jeune, 1824. 8vo. 21 pp. Original printed wrappers.
 Jean Marie Léon Dufour (1780-1865), a French army surgeon, was a thorough and methodical anatomist, especially of arthropods. This the whole *Annales des Sciences Naturelles*, Tome II - Aout, 1824. This journal issue contains some 15 articles on natural history, among them several entomological articles, e.g. by Audouin. The paper by Dufour is on pp. 462-482. A very good copy in original wrappers, paper on spine partly gone. Some articles in this volume were illustrated with plates. The plates were larger than the text, and separately published in an atlas, which is not present here. The article by Dufour should have two plates, which are thus not present in our copy.

- EC05628 **FUCHS, G., 1912.** €50,00
Handwritten two-page letter from Gilbert Fuchs to Dr. Leisewitz (?) dated 8-4-1912; Difficult to read.
Gilbert Fuchs (1871-1952) was besides an entomologist, a German figure skater and world champion in figure skating. In 1896, he won the first world figure skating championships, held in St. Petersburg, Russia. In 1906 he recaptured the title in Munich.
Fuchs learned figure skating on his own, after learning gymnastics, weightlifting, and stone put. After finishing secondary school, he served in a cavalry regiment, later studying agriculture in Vienna. Still later, he moved to Munich, Bavaria, in Germany and studied forestry. He wrote and published: "Theory and Practice of Figure Skating" (German: "Theorie und Praxis des Kunstlaufes am Eise").
Beyond figure skating, Fuchs studied the morphology of the bark beetle (German: Borkenkäfer). In 1929, in his late fifties, he wrote his PhD thesis titled "European timber industry after the war" (German: "Europäische Holzwirtschaft der Nachkriegszeit").

 Tableaux analytiques des coléoptères de la faune Franc-Rhénane (France, Hollande, Belgique, Région rhénane, Valais). Famille I. Cicindelidae (Deuxième édition) [AND] Faune entomologique Armoricaire: coléoptères geocarabiques. Ire famille: cicindélides, 2e famille: carabides [INCLUDING] Catalogue des carabiques Gallo-Rhénans; Two volumes in one. 41, 328 p., 237 text figures, later full cloth, green morocco label with gilt title on spine.
 The Cicindelidae is included with the 9 page work by Houlbert and the 41 page edition by Barthe, showing the progress in the knowledge of the family over two decades. The Carabidae, however, form the major part of this book. A good clean set in a good binding.

 Tableaux analitiques des coléoptères de la faune Franco-Rhénane. Fascicule 79: Curculionidae; Two parts in one. 604 p., half cloth (marbled boards) with gilt title on spine.
 From the series "Miscellanea Entomologica". The region covered is France, Belgium, The Netherlands, the middle Rhine area and Valais. In this copy, parts 1 and 2 appear to be in reverse order (*Apioninae* first, *Ceuthorrhynchina* last). A good copy.
- EC27344 **ILLIGER, K., 1800.** €120,00
 Olivier's entomologie oder Naturgeschichte der Insekten mit ihren Gattungs- und Artmerkmalen, ihrer Beschreibung und Synonymie. Käfer; xvi, 309, [1] p., square 4to, later white half cloth over marbled boards.
 An important contribution to coleopterid systematics, however, only the first part. According to Horn-Schenkling "Mit Taf[eln] sehr selten". A rather poor copy, with repairs to the title, and some dampstaining. The two plates are early photocopies. Horn-Schenkling 11174.
- EC27774 **ILLIGER, K. (ED.), 1801.** €58,00
 Magazin für insektenkunde. Ersten Bandes. Erstes und zweites Heft; 260, [1] p., paperbound (contemporary plain covers). Very rare first part of this early German entomological journal. After the introduction of the journal, this first half of this volume contains primarily papers on Coleoptera (mostly written by Illiger): Nachtrag und Berichtigungen zum Verzeichnisse der Käfer Preussens (94 p.) / Ist es richtiger, Genus durch Geschlecht oder durch Gattung auszudrücken? (10 p.) / Neue Insekten (44 p. - mostly Coleoptera and Hymenoptera) etc. etc. One of the greatest rarities in entomological literature published by the famous Johann Illiger (1775-1815). No plates have been published in this journal.

 Genera des Coléoptères d'Europe comprenant leur classification en familles naturelles, la description de tous les genres, des tableaux dichotomiques destinés à faciliter l'étude, le catalogue de toutes les espèces, de nombreux dessins au trait de caractères, et plus de treize cent types représentant un ou plusieurs insectes de chaque genre dessinés et peints d'après nature avec le plus grand soin; 4 volumes (complete). cclxxvi, 136, 295, 285, [2], 463, [1], 292 p., 15 (11 plain), 43, 67, 100, 78 hand-coloured pls, small 4to, somewhat later cloth. Library stamp on title-pages and verso (back) of the plates (Mus. Hist. Nat. Laboratoire d'Entomologie. Bibl.: A. Finot), some slight foxing in several plates but most of the plates clean. Ex library Claude Gouffé.
 This is reputedly one of the finest coloured books on coleoptera ever made. The fine drawings were made by Jules Migneaux (some in the last volume also by Théophile Deyrolle), and the superb colouring on the 293 plates (of 304, as 11 depicting anatomy etc. are plain) were done by Madame Migneaux.
 Pierre Nicolas Camille Jacquelin du Val (1828-1862) died young and Léon Fairmaire finished the work.

Rundschreiben der Arbeitsgemeinschaft der Rheinischer Koleopterologen (gegr. 1927) im naturhistorischen Verein der Rheinlande und Westfalens. [AND] Mitteilungen der Arbeitsgemeinschaft Rheinischer Koleopterologen. Volumes 1-17; In issues. Numerous pages and illustrations. Original printed wrappers. In three green boxes.
A long run of this little-known periodical on the beetles of western Germany. The series contains the Rundscheiben 1988(2-3), 1989(1-4), and 1990(1-4). Apparently the very first issue is lacking. From 1991 onwards the title changed to "Mitteilungen", and the quality of the papers was much increased. Volumes 10 and 13 consist of two parts, all other yearly volumes where issued in four parts, although often two parts were combined into a single issue. A very good set. Rare.

- EC27494 **MARTYN, T., 1792.** €1400,00
Entomologist anglais, ouvrage ou l'on a rassemblé tous les insectes coleoptères qui se trouvent en Angleterre et qui forment plus de 500 espèces différentes d'insectes dont les figures n'ont jamais été données au public; se tout exactement dessiné et peint d'après nature, arrangé selon le système de Linnaeus; [iv], 33, [iv] p. (in English), 33 pp. [= pp. 9-41] (in French), [iv] (a repeat of the plate index). Engraved title, two engraved plates with medals called "Aurea Numismata" and 42 nicely hand-coloured stipple-engraved plates depicting Coleoptera, roy. 4to (33 x 26.3 cm), contemporary full calf, spine rich gilt, marbled flyleaves, marbled edges.
First large format French paper edition of this classic work on British beetles. An English edition was published in the same year with the same plates. In this copy, there is a French title-page, but the text of both editions are combined. That is: the English dedication pages to "His catholic majesty Charles IV. King of Spain, and the Indies", the descriptive text in English and French, and the General table [heading in English] after each descriptive part. According to Horn-Schenkling: "Sehr selten." Two "medal" plates are included as good photocopies, however their relevance must be limited since they are neither numbered nor called for in the text, nor listed in the index. They depict medals supposedly received by Martyn in honour of his conchological work. Original spine except head and tail laid down. Last text page and last plate a bit spotted. In all, a nice copy with broad margins, and complete for the Coleoptera. Horn-Schenkling, 14665; Nissen ZBI, 2726.
- EC27496 **MATEU, J., 1972.** €35,00

 Histoire Naturelle des Coléoptères de France. Tribu des Mollipennes; 440 p., 3 pls, paperbound (partly loose, with original covers of the Annales). Pages 329-344 with repaired tear in inner margin. Unopened and uncut copy. Published in: Annales de la Société Linnéenne de Lyon.
 This is the journal version, no official title-page was issued, but it is a copy with broader margins as usual. One of the scarcer volumes from the series.
- EC05598 **MULSANT, E., 1862 (1ST ED.).** €22,00
 Souvenirs d'un voyage en Allemagne; 144 p., paperbound (plain covers). Title-page and half-title missing. Faint marginal waterstain.
 Mulsant was a French entomologist specialized in Coleoptera. He travelled to Liège, Cologne, Stettin, Berlin, Dresden, München, Zürich, Genève. His voyages led him to many of his colleagues and their collections, and thus apart from being only a narrative of an interesting journey to Germany, Mulsant's account gives a rare insight in the scientific society of those days.

- EC27605 **PANZER, G.W.F., 1795.** €350,00
 Deutschlands Insectenfaune oder entomologisches Taschenbuch für das Jahr 1795 / Entomologia Germanica exhibens Insecta per Germaniam indigena secundum classes, ordines, genera, species, adiectis synonymis, locis, observationibus. I. Eleuterata. Cum tabulis aenis; Two title-pages, [8], 372 p., 12 partly hand-coloured engraved plates with explanatory text leaves, small 8vo, original pictorial paper covered boards.
 The first title of this early contribution by Panzer suggests an entirely different work, namely a yearly calendar of the occurrence of German insects, however, this remains restricted to a table for the month of January, each day given the name of an entomologist or naturalist writer. The rest of the book, including the fine, detailed, and partly coloured plates, deals with German (ground) beetles ["Eleuterata"], including many new species. Boards slightly rubbed, especially at joints, otherwise a very good, clean copy. Rare. Hagen II, p. 27; Horn-Schenkling, 16729; Nissen ZBI, 3086.
- EC27615 **PAULIAN, R., 1941.** €35,00

 Faune de France 63. Coléoptères scarabéides (Deuxième édition, revue et augmentée); [2], 298 p., 445 text figures, publisher's grey printed cloth.
 Contains more species than the 1941 first edition, and an updated taxonomy. With many detailed drawings, and keys. This version is slightly larger (broader margins) than the simultaneously published Faculté des Sciences edition. Included in the rear is a list of all the published works in the series "Faune de France". Added: some keys to Scarabaeoidea in photocopy. Cloth a bit rubbed at lower front edge, a few, mostly marginal annotations in pencil by someone who clearly knew his scarabs. Otherwise a good copy. Rare.

 Coleoptera (Käfer) and Strepsiptera (Fächerflügler) in: Die Tierwelt Mitteleuropas. Insekten. 2. Teil; 298 p., 51 plates, paperbound (original stiff printed covers).
 The series "Die Tierwelt Mitteleuropas" was published by P. Brohmer, P. Ehrmann, and G. Ulmer. This part deals mainly with beetles. A smaller portion treats the Strepsiptera Kirby, 1813, and was written by G. Ulmer. The latter group is parasitic on members of many other insect orders and their closest affinity is still disputed. Very well-illustrated. A good clean copy, uncut.

 Genera et species curculionidum et catalogus; 279 p., small 8vo (14.8 x 9.6 cm), later green cloth, original printed wrappers bound in.
 Very rare catalogue and list of species and genera by the famous Swedish entomologist Carl Johan Schönherr (1772-1848) commissioned by the Société Entomologique de France. See Horn-Schenkling under H. Jekel. The same author published the famous and rare "Genera et species Curculionidum" in eight volumes (1833-1844) of which this might be regarded as a supplement. Bookplate on front pastedown and vague library stamp on title page. The front wrapper browned, and previously stuck to the front board with some loss. Title pages and text only with minor spotting; a good copy. Horn-Schenkling, 11134.

 Revue Entomologique publiée par Gustave Silbermann. Volume III (=nos. 13-16); Three parts in three. 222 p., 2 hand-coloured plates, paperbound (original printed yellow covers).
 These are the first four parts of volume III, which should be complete with 334 p. and 5 plates. Only five volumes have been published. Publication ceased in 1840. Any parts or volumes are very rare. Mainly on Coleoptera. It contains Hope's "Description d'un cérambycin nouveau" with one hand-coloured engraving and "Description d'un macraspin nouveau" by Spinola, also with one hand-coloured plate of a beetle. A few library stamps. First part with waterstain, the lower corner of the front wrapper, half-title and title page with a large paper repair, other parts a bit foxed. Plates rather good.

EC19008 **THOMSON, J., 1859.** €900,00 [Picture on our website!](#)

Monographie des Cicindélides ou Exposé méthodique et critique des Tribus, Genres et Espèces de cette famille; xvii, 66, [2] p., 10 (9 hand-coloured) lithographed pls, roy. 4to, paperbound (original printed covers, spine worn, small corner of front cover and back cover missing). Some scattered slight foxing in most of the text and the coloured plates; half-title, title-page and first uncoloured plate somewhat more foxed.

James Thompson (1828-1897) was an American entomologist living in Paris who spent a good deal of his fortune on coleopterological publications and beetle collections. The Cicindelidae were one of his favourite groups and this work contains the descriptions and illustrations of many new and little-known species. One of the most beautiful monographs published on Coleoptera. The plates are after drawings of Nicolet and engraved by Lebrun, and the excellent colouring is done by Mme Vaillant. It has a remarkable hand-coloured engraved frontispiece showing two beetles fighting in a landscape amidst ornamental flowers and smaller beetles, two cherubs holding a gilt coat of arms, and a winged female holding a box of mounted specimens.

An account of British flies (Diptera). Volume 1. Including the classification Aphaniptera to Chironomidae (All published); xix, 215 p., 4 plates, contemporary half cloth with gilt vignette on front board and gilt title on spine.
This work "upon this much-neglected order of insects", deals with fossil Diptera, dipterid systematics, Aphaniptera, or fleas (now no longer regarded as dipterids), Cecidomyiidae or gall gnats, Mycetophilidae, or fungus gnats, Bibionidae, Simuliidae, and Chironomidae or midges. Some dealers describe the book as "half leather", but that is incorrect; the original, publisher's binding, with the gilt fly on the front board, is in brown and green cloth. Uncut. With armorial library bookplate (cancelled) on front paste-down, endpapers a bit spotted, otherwise very good.

 First [second, third & fourth] report of the Wellcome Tropical Research Laboratories at the Gordon Memorial College Khartoum (complete set including supplements); With 71 colour-printed plates (30 of these entomological, 38 of microscopical specimens, two ornithological, one of a medical instrument) and numerous black and white plates and text figures, 3 col. maps, contemporary original blind stamped cloth bindings with gilt titles on spines and front boards.
 A complete set of four reports in seven volumes., including the supplements to the third and fourth reports. Rare to find complete, certainly with the supplements present. Many articles on medicine but also some on the ethnography of Sudan and on insects. Includes descriptions of new species, mainly in Diptera. The coloured plates of flies, true bugs (Hemiptera, "Homoptera") and Coleoptera are very good. Library bookplate on inside cover, some library stamps, some marginal worming, mainly to inside boards and endpapers in a few volumes, otherwise very good. Cat. BM(NH) Suppl. p. 560.

EG27862 **BODEMEYER, B. VON, 1927.** €78,00

Ueber meine entomologischen Reisen nach Kleinasien (1911), Ost-Sibirien, Schilka und Amur (1912), Tunis, Oasis Gafsa, Khroumerie (1913) und Iran, das Elbursgebirge (1914); Four parts in one. 350 p., 8 plates, later hardbound with title on spine. Original printed wrappers bound in.

The entomological adverts in the rear of each publication are interesting. In one, Bodemeyer himself asks for "Deutsch-stämmige Carabini 'genaueste Fundorte' am liebsten unpräpariert". The author is present in most of the photos of the book. For some reason the four parts are bound out of sequence (1-4-3-2). Small printed label of a former owner on the title page top-margins, otherwise a very good set.

EG27863 **BODEMEYER, B. VON, 1927.** €85,00

Ueber meine entomologischen Reisen nach Kleinasien (1911), Ost-Sibirien, Schilka und Amur (1912), Tunis, Oasis Gafsa, Khroumerie (1913) und Iran, das Elbursgebirge (1914); Four parts in one. 350 p., 8 plates, later quarter calf over cloth boards, gilt title on spine. Original printed wrappers bound in.

A nicely bound complete set of these interesting travel reports about remote areas, seldom visited by entomologists. The author is present in most of the photos in the book. The entomological adverts in the rear of each publication are interesting. In one, Bodemeyer himself asks for "Deutsch-stämmige Carabini 'genaueste Fundorte' am liebsten unpräpariert". A nice, clean copy.

 Naturgeschichte der Insekten, besonders in Hinsicht ihrer ersten Zustände als Larven und Puppen. Lieferung 1 (all published); v, 216 p., 10 engraved plates, later full cloth with gilt title on spine.
 A rare work with descriptions of many new species. It is unknown why no more was published. The botanist and entomologist Peter Friedrich Bouché (1785-1856) was a garden director in Berlin and published mainly on Diptera but is perhaps best known for his "Naturgeschichte der schädlichen und nützlichen Garten-Insekten und die bewährtesten Mittel zur Vertilgung der ersteren" (1833). Inscribed by Westwood on the title page. Some marginal annotations (by John Westwood?) and light pencil notes on the plates, otherwise a good copy. Hagen I, p. 77; Horn-Schenkling, 2093.

 Medizinische Zoologie oder getreue Darstellung und Beschreibung der Thiere, die in der Arzneimittellehre in Betracht kommen. Zweiter Band. [Pisces to Ostrea edulis. Essbare Auster]. Nachträge zu Band I. Nachträge zu band II. Register. Uebersicht; iv, 364 p., 39 engraved plates (of which 17 hand-coloured) on 36 sheets (some folded), 4to, later half calf over marbled boards, gilt lettered morocco label on spine.
 Rare work on medical zoology, this volume dealing especially with invertebrates, including crustaceans, insects, snails, bivalves, cephalopods, etc., and fishes. The first volume (not present) deals with vertebrates, except fish. Most plates are either hand-coloured illustrations of whole animals, or (the minority) plain plates showing anatomical details of the same or related species. Some plates a bit foxed and six plain plates with a small waterstain and one plain plate more waterstained, otherwise a good copy. The hand-coloured plates are very good.  An early work on plant-insect symbiosis. The second half of this book contains a systematic account of plants which serve as food for the various species of insects. It refers often to Linnaeus, Leeuwenhoek, Reaumur, Bonnet, Duhamel de Monceau, etc. Pritzel and Horn-Schenkling wrongly quote one plate, this copy, however, is complete. Half-title and errata sheet a bit spotted, otherwise a very good clean copy. Rather rare. Horn-Schenkling, 2440; Pritzel, 1142

 Histoire naturelle des animaux articulés annelides: crustacés, arachnides, myriapodes et insectes. Histoire des insectes coléoptères (tomes I and II by Castelnau), orthoptères, neuroptères, hémiptères, hyménoptères, lépidoptères et diptères (tome III, by Blanchard). Avec une introduction renfermant l'anatomie et la physiologie des animaux articulés par M. Brullé; Three parts in three. cxxv, 324, [1], 563, [1], 672, [1] p., 43, 38, 72 hand-coloured or tinted plates, later half cloth over marbled boards, gilt titles on spines.
 The scarce first edition. Contains the descriptions and illustrations of many new and little known species of Coleoptera, Diptera, and Lepidoptera, etc. Horn-Schenkling quotes four volumes, but volume IV, by Lucas (on crustacés and arachnides), is often lacking, as in this set. For the Insecta (each with its own title page) this set is complete (the plate index in volume three calls for four plates in Diptera, but actually there are five plates). The general introduction to the anatomy of the arthropods by Brullé is present. Uncut. As usual foxed in the text due to the quality of the paper, and most plates browned due to the same. The work was reissued in 1850-51 with new title pages. Especially some of the beetle and butterfly images are very beautiful. Horn-Schenkling, 3265; Nissen ZBI, 838.

EG21022 **DELESSERT, A., 1843.** €540,00

Souvenirs d'un voyage dans l'Inde exécuté de 1834 à 1839; Two parts in one. [6], iii, 134, [4], 107 p., several figs, 33 (of 35) pls (22 beautifully hand-coloured), 1 folded map (with repaired tear), contemporary red half (spine gilt, stain on margin of back cover). Some slight scattered foxing. Plate 15 (Orthoptera) is missing. Plate 8 (depicting the bird *Siva strigula*) is bound twice and replaces plate 10 (depicting the bird *Francolinus hardwickii*) which is not present.

The plates depict views of landscapes (first 8 unnumbered and uncoloured pls), Plates 1-6 (3 uncoloured) depict mammals, plates 7-10 depict birds (one double and one missing), plates 11-14 depict Coleoptera, plates 15-16 depict Orthoptera (one missing), and plates 17-27 depict Lepidoptera.

Adolphe Delessert visited Mauritius, Reunion, Netherlands Indies, Calcutta, Bengali, Bomba and Goa. He studied the inhabitants, the flora and fauna of these regions, and brought back important collections which included many specimens of yet undescribed species.

Stamps and written names of previous owners on front paste-down, first blank, half title and title page, including the lepidopterologist Pierre Gauroy (his stamp also on plate B, touching a figure). Apparently this is the second edition (1896 first, 1924 third). 16 pp. catalogue of Klincksieck bound in the rear.
- EJ27154 **DONNAUD, E. (ED.), 1868.** €80,00
 l'Insectologie agricole, journal traitant des insectes utiles et de leurs produits, des insectes nuisibles et de leurs dégats et des moyens pratiques de les éviter. Deuxième année; 380 p., 12 plates (mostly hand-coloured or tinted), original pictorial boards.
 The second volume (of four known), of a journal on insects in agriculture edited by E. Donnaud. The fine plates show noxious insects (mainly beetles, and stinging flies and their eggs) in full colour, and mites (tinted plates). Boards rather soiled and frayed at edges, but the pictorial front cover still quite good. A mostly rather vague dampstain on the lower outer corner, otherwise a good copy. Rare.

EG27155 **DONOVAN, E., 1793-1802.** €2500,00

The natural history of British insects; explaining them in their several states, with the periods of their transformations ... together with the history of such minute insects as require investigation by the microscope. Volumes 1-10 (of 16); With 360 beautifully hand-coloured engraved plates, contemporary full speckled calf, spines with gilt lines, black morocco medallion with gilt number and black morocco shield with gilt title. Gilt dentelles. A uniformly bound set. A few boards detached, some text pages and tissue guards a bit toned or spotted, the plates usually clean. Plates 68 and 69 placed in the correct order, following the erratum. A good set. Horn-Schenkling, 4949; Nissen ZBI, 1142.

The work was first intended to comprise only 10 volumes, at a later date it was decided to publish another 6 volumes. Together with the work of Curtis, this is the most attractive publication on British entomology. The plates are exquisitely hand-coloured and each depicts one single species, of which some are described for the first time. The few plain plates mostly show anatomical detail. "Donovan was a talented and faithful illustrator, and his figures are noteworthy for their vivid colours. His 'Natural History' does not treat insects systematically, however. His beetles, flies, moths and bugs follow one another in no particular order. In the course of it Donovan described a number of new species which often still bear the name he bestowed on them. The work includes all sixty-two British butterflies then known..." (Salmon, *The Aurelian Legacy*). The work is often found in mixed issues; in this copy the first volume is in the second issue (1802). With the bookplate of William Henry Irby "Honor fidelitatis praemium" and the small bookplate of Mildred Bliss. A few boards detached, some text pages and tissue guards a bit toned or spotted, the plates usually clean. Plates 68 and 69 placed in the correct order, following the erratum. A good set. Horn-Schenkling, 4949; Nissen ZBI, 1142.

EG27156 **DONOVAN, E., 1842 (2ND ED.).** €120,00

Natural history of the insects of China, containing upwards of two hundred and twenty figures and descriptions, ..., brought down to the present state of the science, with systematic characters of each species, synonyms, indexes, and other additional matter, by J. O. Westwood; [4], 96 p., later blue cloth with gilt title on spine. Rare.

Text only (no plates are present), but the text is also important for its information on Chinese insects, and the updates on the work of Donovan and others. Title-page a bit foxed and with small, inobtrusive blindstamp, and library stamp remains on the first blank. Nissen ZBI, 1143.

Entomologie analytique: histoire générale, classification naturelle et méthodique des insectes à l'aide de tableaux synoptiques; Two parts in one. xxii, 1340 p., one folding table, numerous woodcuts, 4to, paperbound (original printed covers).

The main entomological work of the French zoologist André Marie Constant Duméril (1774-1860). A huge and rare compilation on the classification and history of insects and the most important treatise in this field from this period. Each genus is represented by a figured species and the etymology of the zoological names is explained. Uncut, unopened. With very wide margins. Horn-Schenkling, 5555.

EG27169 **DUNCAN, J., 1840.** €110,00

The naturalist's library. Conducted by Sir William Jardine, Bart. Introduction to entomology Vol. I; xvi, 331 p. engraved portrait, engraved hand-coloured title vignette, 36 [1-35, 12*] plates, of which all but five partly or entirely hand-coloured), 12mo, original brown cloth. Gilt title on the spine. Green endpapers. The first (of seven) volumes forming the entomological section of Jardine's very popular natural history series. It includes chapters on the entomologists De Geer and Swammerdam. The plates mainly include Orthoptera, mantises, Odonata and Lepidoptera. Plate 35 is erroneously numbered 37, as noted in the errata list on page xvi. The plain plates are never coloured. The statement on p. xv "In all Thirty-eight Plates in this volume" is simply wrong unless one includes the frontispiece portrait of De Geer, and the title page. Pictorial bookplate on the front paste-down, rebacked, boards rather worn, a bit soiled, otherwise good. Nissen ZBI, 4708.

EG27170 **DUNCAN, P.M., 1870 (1ST ED.).** €60,00

The transformations (or metamorphoses) of insects (Insecta, Myriapoda, Arachnida and Crustacea); xi, 480 p., one wood engraved frontispiece (tissue-guarded), about 40 fine page-sized woodcuts, and many smaller ones in the text, original gilt and black stamped pictorial cloth. All edges gilt.

A fine production with splendid wood-engravings which come from Émile Blanchard's "Métamorphoses, mœurs et instincts des insectes" (1868). There have been several reprints, but this is the quite rare first edition. Bookblock split, some light foxing, otherwise a good copy. Horn-Schenkling II(1), pp. 640-41.

- EG27190 **EMMONS, E., 1854.** €140,00
 Agriculture of New-York: comprising an account of the classification, composition and distribution of the soils and rocks, and of the climate and agricultural productions of the state; together with descriptions of the more common and injurious species of insects; viii, 272 pp., 50 lithographed plates of which 47 hand-coloured, 4to, later black cloth with gilt title on the spine.
 This is part V of the Agriculture of New York and is the complete entomological section. The three plain plates depict anatomical details, the remainder mostly Coleoptera and Lepidoptera. The text a bit browned and the explanations of the plates are brittle and browned. Several plates with offsetting (four rather heavy). Library stamp on front paste-down. Pencil notes in the text and one original pencil drawing on verso of plate 32, top outer corners of the explanatory leaves all with a small clipping.
- EG27191 **EMMONS, E., 1854.** €250,00
 Agriculture of New-York: comprising an account of the classification, composition and distribution of the soils and rocks, and of the climate and agricultural productions of the state; together with descriptions of the more common and injurious species of insects; viii, 272 pp., 50 lithographed plates of which 47 hand-coloured, 4to, publisher's blind-tooled cloth with gilt vignette on the front board and gilt title and vignette on the spine.
 This is part V of the "Agriculture of New York" and it is the complete entomological section. The three plain plates depict anatomical details, the remainder mostly colourful Coleoptera and Lepidoptera, but also Odonata, etc. The descriptions are detailed and include notes on their larvae, distribution, fodder plants and economical importance. A few text pages age-toned. Some, mostly marginal, foxing throughout, but generally clean, except for the explanatory leaves which are more foxed, as are two butterfly plates. All other plates are only marginally foxed or clean. Spine ends a bit chipped, as often, otherwise a much better than average copy. Horn-Schenkling, 5979.

EG27281 **HARRIS, T.W., 1862 (2ND ED.).** €35,00

A treatise on some of the insects injurious to vegetation. A new edition, enlarged and improved, with additions from the author manuscripts and original notes. Illustrated by engravings drawn from nature under the supervision of Professor Agassiz, edited by Charles L. Flint, secretary of the Massachusetts State Board of Agriculture; xi, 640 p., numerous woodcuts in the text, 8 hand-coloured plates, hand-coloured frontispiece, original blind-tooled pictorial cloth, showing a large gilt moth on both front and rear board.

This work is very well-illustrated, in fact much better than in many similar works aimed a public of farmers and foresters. The coloured plates mainly show butterflies and moths. Bookplate on front paste-down, several plates a bit foxed in the margins, otherwise a good copy of this revised edition.

EG27285 **HASKELL, P.T., 1961.** €12,00

Insect sounds; 189 p., 97 text figures, partly printed as plates, brown buckram with gilt title on spine. Interesting study on the song patterns of insects - one of the first of its kind. Library stamp on front paste-down, inoffensive blindstamp on title page leaf, otherwise good.

- EG27321 **HORN, W. & S. SCHENKLING, 1928-1968.** €600,00
Index litteraturae entomologicae serie I: Die Welt-Literatur über die gesamte Entomologie bis inklusive 1863 (AND) Index litteraturae entomologicae series II: von 1864 bis 1900; Eight volumes in six. Text with four frontispieces with portraits, 8vo/4to, contemporary half-calf over marbled boards, gilt titles on spine (I) and original grey cloth with gilt titles (II).
The only compilation of all entomological contributions up to 1900, now rare in original print, especially the first series (with indexes up to 1863) published privately by Horn. This is by far the most important bibliography on entomology. The second series is by W. Derksen and U. Scheiding-Göllner, but traditionally referred to as "Horn Schenkling" as well. Library stamps on front paste-downs, volumes to part I crudely taped. Lacking the 1975 index to the second series. Contents good.

- EG27353 **JÄGERSKIÖLD, L. A. (ED.), 1904-1911.** €250,00
 Results of the Swedish zoological expedition to Egypt and the White Nile 1901 under the direction of L.A. Jägerskiöld. Parts I-IV; Numerous pages and plates. Slightly later buckram with gilt title on spine. Original printed wrappers bound in and with the preliminary index to parts I-III.
 Leonard Axel Jägerskiöld (1867-1945) travelled for eight months (December 1900 - July 1901) through Egypt and up along the White Nile together with two students, Teodor Odhner and Ivar Trägårdh. The zoological results were published in at least 29 papers (occupying volumes I-IV, here present) of the expedition results, of which no less than 17 are on Insecta, arachnids and myriapodes, with the descriptions of many new species by several specialists. A fifth part was published much later, in 1928, and is not included. Original wrappers rather tattered (some repaired) due to paper quality. Text and plates good, uncut.
- EG27355 **JAKUBSKI, A.W., 1965.** €15,00
 A critical revision of Margarodidae and Termitococcidae (Hemiptera, Coccoidae); 186 p., 1 coloured frontispiece, numerous text figures, cloth (dust jacket). Spine with gilt title.
 A major revision, not only with new species but also new higher, family-level taxa, and including several new species. Usually this work is found "ex library", but this copy is in mint condition.
- EG09782 **JANET, C., 1912.** €20,00
 Le sporophyte et le gamétophyte du végétal, le soma et le germen de l'insecte; 65 p., 7 figs, 1 folded table, paperbound (printed covers).
- EG27357 **JARZEMBOWSKI, E.A., 1984.** €15,00
 Early Cretaceous insects from southern England; 23 p., 55 text figures, 2 full colour plates, no covers (not issued).
 Discusses specimens from the Wealden Beds belonging to many orders including Odonata, Blattoidea, Orthoptera, Hemiptera, Neuroptera, Coleoptera, Mecoptera, Diptera, Trichoptera, Hymenoptera, Isoptera, Raphidioptera. Well-illustrated.
- EG21087 **JEANNEL, R., 1943.** €20,00

- EG27359 **JEANNEL, R. (ED.), 1935-1952.** €380,00
 Mission Scientifique de l'Omo. [Zoologie, fascicules 1-(63)]; 63 papers in nine. Text with numerous plates and figures, paperbound (original, near uniform printed covers).
 Important entomological contribution to southern Ethiopia (but also with ichthyological and herpetological and a few other non-entomological contributions). It contains, for instance, Coleoptera by R. Jeannel, Pic, Horn, Paulian and others; Diptera by E. Seguy; Lepidoptera by Le Cerf; Orthoptera by Uvarov, Chopard, and reptiles and amphibians by Roux. Deals also with mammals, crustaceans, etc. The papers published in volumes II-VI are bound in one or two; the three fascicules from volume VII have their own wrappers. Fascicule number 62 is used three times, one being an error of number 61 (both are on Coleoptera), the other, dealing with Hydracarina, probably is number 63. This seems to be last part published. Volume I describes the geology, paleontology and anthropology, thus the Zoology, as far as we know, is complete. A good set in original wrappers, mostly uncut, unopened.

- EG27389 **KIRBY, W.F., 1892 (2ND ED.).** €25,00
 Elementary text-book of entomology. Second edition revised and augmented; 289 p., 86 plates, 1 frontispiece, red cloth with gilt title on spine.
 With many plain but nice plates. Ex library copy with library stamp on verso of the frontispiece, and on two text page margins, otherwise very good.
- EG27385 **KIRBY, W. & W. SPENCE, 1822-1828 (3RD / 4TH ED.?).** €300,00
 An introduction to entomology: or elements of the natural history of insects. Second/third edition. Volumes I-IV (complete); Four parts in four. xxiv, 519, [2], 531, viii, 732, iv, 635 p., 30 (6 hand-coloured) pls (includes frontispieces), 2 portraits, 1 folded table, 19th century (publisher's?) uniform full grained cloth with gilt titles on spines.
 There have been at least seven editions of this popular work. In this set the title pages state that this is the 4th edition for volume I, and the third for vol. II, but the dates suggest that this is incorrect. Parts III-IV do not have the edition mentioned. Kirby's "outstanding achievement was an introduction to entomology, written with William Spence. This was a general entomology but in the last volume Kirby presented a history of entomology and his own system of the higher units, in which he was highly influenced by W. S. MacLeay (1792-1865)" Smith, Mittler, Smith, eds., History of Entomology, p. 123. As usual the text is somewhat browned due to the quality of the paper and the plates are foxed; those of parts III-IV and the frontispieces more heavily and are waterstained too. Book plate (with poem) on front paste-downs. Nissen ZBI, 2189.

EG11264 **LINNAEUS, C. [LINNÉ], 1767 (13TH = 12TH ED.).** €365,00

Systema Naturae, per regna tria naturae, secundum classes, ordines, genera, species cum characteribus, differentiis, synonymis, locis. Editio decima tertia, ad Editionem duodecimam reformatam Holmiensem. Vol. 1 (Zoology part). Pars II; pp. [1], 533-1327, [1-36 = index and addenda], contemporary, polished full calf (skillfully rebacked, with new red label. This part has only an original half-title, as the original title-page was issued in Vol. 1. Pars I, but we have added a photocopy of the full title-page.

This so-called "thirteenth" edition is totally identical to the rare twelfth edition published in 1766-1768. The 12th edition is of great importance as it was the last edition revised by Linnaeus and which includes more species than the famous 10th edition. We offer here the first volume, Second part treating insects (536 p.), molluscs (164 p.) and other invertebrates.

- EG27564 **MULSANT, E., 1853-1873.** €500,00
 Opuscles entomologiques. Volumes 1-4, 8-10, 12-16 (last). Paris, L. Maisson, 1853-1873. 12 parts in ten. Large 8vo. Text, and 17 plates and 17 portraits. Partly bound, partly in original printed wrappers.
 Rare set of Mulsants collected works. Contains the descriptions and illustrations of numerous new and poorly known insects, of which the Coleoptera and Diptera are quite prominent. Also with some obituaries and biographies. Several papers have co-authors, such as Rey and Godart. Some parts a bit spotted, but mostly clean. The first four parts, and parts 13-15 in bindings with rich gilt spines, the remainder in original printed wrappers, one (vol. 12) with the margins rather crudely cut, most with broad margins. Some unopened. Volumes 5-7 and 11 not included in this set. Horn-Schenkling, 15694; Index Litt. Ent., vol. 3, p. 157.
- EG27945 **MULSANT, E., 1862 (1ST ED.).** €40,00
 Souvenirs d'un voyage en Allemagne; [6], 144 p., paperbound (original printed covers). Very good unopened, uncut, almost mint copy.
 Mulsant was a French entomologist specialized in Coleoptera. He travelled to Liège, Cologne, Stettin, Berlin, Dresden, München, Zürich, Genève. His voyages led him to many of his colleagues and their collections, and thus apart from being only a narrative of an interesting journey to Germany, Mulsant's account gives a rare insight in the scientific society of those days.

 Wahre Parthenogenesis bei Schmetterlingen und Bienen. Ein Beitrag zur Fortpflanzungsgeschichte der Thiere; vi, 144 p., 1 plate, later marbled boards and flyleaves.
 This was the only edition. According to DSB, "While in Munich, Siebold completed 'Ueber die Band- und Blasenwürmer nebst einer Einleitung über die Entstehung der Eingeweidewürmer' and actively participated in the research of his student Bilharz. Siebold's most important topic of research, however, was parthenogenesis. The plate of this work shows the adult animal, the larvae and the shells they occupy and modify. Apparently, next to Lepidoptera and Hymenoptera it includes Trichoptera too. Library stamps on the front endpapers and title page. Some foxing due to the quality of the paper, and a rather vague waterstain at the lower inner margin. Rare. DSB vol. 12, p. 421; Horn-Schenkling, 20376.

Die Schmetterlinge Europas [AND] Die Raupen der Schmetterlinge Europas. Zweite Auflage von E. Hofmann's gleichnamigem Werk 60 Tafeln mit über 2200 Abbildungen; Four volumes in four. 1044 p., 353 text figures; 155 chromolithographed plates, uniform contemporary pictorial (Jugendstil style) boards, uniform patterned endpapers (Die Schmetterlinge), later half calf over marbled boards. Spine with gilt ornaments and title, marbled endpapers, red edges (Die Raupen).

This is the final and best edition of Hofmann's work "Die Grossschmetterlinge Europas", with all the fine coloured lithographed plates, including the important fourth volume of the "Raupen" or caterpillars (with 50 plates), reworked by Arnold Spuler, and its "Nachtrag" (with another 10 plates). These caterpillar parts are often lacking. The various families were treated by several experts, e.g. Geometridae by H. Rebel, and Tortricidae by J. von Kernel. The Schmetterlinge parts rebaked. The Raupen in a different, attractive, binding. Spines rubbed (Schmetterlinge parts), old stamp on the title pages (Raupen part clean), otherwise internally clean and overall a good set. Nissen ZBI, 1973a.

EJ27891 **THE AMERICAN ENTOMOLOGIST [WALSH, B.D. & C.V. RILEY EDS.], 1868-1880.** €140,00

The American entomologist: an illustrated magazine of popular and practical entomology. Volumes 1-2; Two volumes in one. 252, viii, 384 p., 1 lithographed portrait (of Benjamin D. Walsh), 1 chromolithographed frontispiece (of the royal horned caterpillar and moth), numerous text figures, 4to, contemporary half calf.

Edited by B.D. Walsh and C.V. Riley. One of the first American journals on economic entomology, founded by Benjamin Dann Walsh (1808-1869). "Walsh was both a pioneer in entomology and the only entomologist of his and Darwin's generation to support and contribute to Darwin's revolutionary theory of species origin" (C. A. Sheppard, Ann. Rev. Ent 49, 2003). From volume 2 no. 6, the journal was renamed: "The American Entomologist and Botanist: an illustrated magazine of popular and practical entomology and botany", because "The two sciences of Entomology and Botany go hand-in-hand". After the death of Walsh, editorship of volume 2 was by Charles V. Riley and George Vasey. This journal is particularly interesting because it shows which insects and insect-related plant diseases attracted the attention of mid-19th century farmers and horticulturists. On p. 241 of vol. 2 we read about a devastating bee disease, and there are also notes on the advance of introduced insects, etc. Binding shaky, backstrip missing, plates and text, however, in very good condition. Horn-Schenkling II(V), 6.

EJ27890 **THE PRACTICAL ENTOMOLOGIST [WALSH, B.D. ED.], 1865-1867.** €135,00

The practical entomologist. Volumes I-II (all published); iv, 128, iv, 122 p., 4to, later black cloth with gilt title on spine.

Edited by B.D. Walsh. The first issue of this monthly was subtitled "Published...for gratuitous distribution among farmers and agriculturists. From the 6th issue it became "Published...for the dissemination of valuable knowledge among Agriculturists and Horticulturists". Remaining, to a large extent, a philanthropical publication it folded after two volumes because of lack of funds. Stamp on front paste-down, endpapers and preliminary pages (with the table of contents) to volume I spotted, sections in volume II age-toned due to paper quality. Otherwise a good complete, rare original set. Horn-Schenkling II(V) p. 47.

EG27859 **VILLIERS, A. ET AL., 1976-1995.** €400,00

Atlas d'entomologie France et d'Europe (Belgique, Suisse, Italie du Nord). Diptères 1-2, Lépidoptères (2-3), Hyménoptères (1-2), Coléoptères (1-2), Neuroptères, Hémiptères, Larves d'insectes, Paléontologie et peuplement de la terre, Initiation a l'Entomologie; Nine volumes (of 15) bound in 13. Numerous plates and maps (of which many coloured), uniform cloth with matching full colour dust jackets.

Important French contributions to the insect fauna of western Europe by Villiers, Seguy, Paulian, Chopard, Jeannel, and others. Very well illustrated with coloured and plain plates after water-colours of Seguy, Prechac, Moreau, and others. The introduction with chapters on faunal provinces and the evolutionary history of the insects is excellent. The part on Hemiptera includes Thysanoptera. Only the first part of the Lepidoptera and the volume on orthoptères are lacking. Scarce, good clean set.

EG27860 **VIRGIN, C.A. (ED.), 1859-1910.** €175,00

Kongliga Svenska fregatten Eugénies resa omkring Jorden under befäl af C. A. Virgin. Åren 1851-1853. Vetenskapliga iakttagelser på H. Maj:t Konung Oscar Den Förstes. [the scientific papers of the expedition, including Insecta]; 617 p., 9 lithographed plates, 4to, paperbound (original printed covers).

Deals with the entomology of one of the famous 19th century scientific circumnavigations. With illustrations of new and little known species. Author include Boheman (Coleoptera), Stål (Hemiptera, Orthoptera), Wallengren (Lepidoptera), Holmgren (Hymenoptera), and Thomson (Diptera). Uncut. A few text pages with slight, marginal foxing, plates mostly fine. Nissen ZBI, 4256.

EG27883 **WAKEFIELD, P., 1816.** €280,00

An introduction to the natural history and classification of insects, in a series of familiar letters with illustrative engravings; x, 192 p, 12 hand-coloured engraved plates, small 8vo, later pebbled cloth with gilt title on spine.

A nice little book with attractive hand-coloured plates, written by Priscilla Wakefield. "Priscilla Wakefield, née Priscilla Bell (1751-1832) was an English Quaker educational writer and philanthropist". The subject is treated in a series of letters, a popular form in those days. Rare, especially in an original, hand-coloured state such as this copy. Uncut. With, strangely, the 12 pp. catalogue of Longman, Rees, Orme, Brown, Green, and Longman, dated August 1822, pasted in front (last two leaves detached). The binding is early- to mid-20th century. One plate re-pasted in, with verso and recto switched. Some spotting throughout, otherwise a good copy. Hagen II, p. 251; Horn-Schenkling, 23024.

EG27899 **WEBER, H., 1938.** €10,00

Biologie der Süßwasserinsekten; 693 p., 13 plates, 501 text figures, publisher's blue cloth with gilt title on spine.

Bound 1980 reprint edition by Cramer (Braunschweig) and Otto Koeltz (Koenigstein) of this classic on aquatic insects. Library stamp on title verso, label on spine foot, else very good.

EG27904 **WEST, L., 1951.** €15,00

The housefly. Its natural history, medical importance, and control; xi, 584 p., 1 portrait, 176 text figures, publisher's cloth with gilt title on spine and front board.

The portrait is of C. Gordon Hewitt, "perhaps the greatest single contributor to a scientific understanding of the biology and sanitary importance of *Musca domestica*" (frontis text). Includes a huge bibliography. With a library stamp on the front pastedown, a small weak blindstamp on the title page, otherwise good.

 Die Pflanzenläuse Aphiden, getreu nach dem Leben abgebildet und beschrieben; viii, 334 p., 54 hand-coloured lithographed plates, later half calf over red boards. Original printed front cover bound in.
 Important early monograph on European Aphidae with beautiful hand-coloured illustrations and including many new species described by Koch. The work was edited by Herrich-Schaeffer, who stated, in the preface dated December 1853, that the work would be finished in ten issues with 60 plates, but it was completed in nine issues with 54 plates. Carl Ludwig Koch (born in 1778) died in the year it was published. The first and the last few plates are a bit foxed in the margins with some marginal foxing in the text as well. Book plate pasted in on front, boards detached, otherwise a good copy. Horn-Schenkling 12046; Nissen ZBI, 2248.

 Monografia delle cocciniglie Italiane. Opera postuma; vii, 555 p., 375 text figures, later grained cloth with gilt title on spine. The entomologist and plant disease inspector Gustave Leonari (1869-1918) was, of course, the right man to describe the Italian Coccidae. Unfortunately he died before completing the work, probably as a victim of the Spanish Flu. The work was then edited by Filippo Silvestri (1873-1949) who added a 3 pp. list of all of Leonardi's works on Coccidae. Library stamp on the front pastedown, small worm hole in the spine, otherwise a good, clean copy.

The second, largest paper paperbound with original printed covers. The first published without covers. Two papers on Macaronesian Hemiptera by the same author, and both published in the society's Commentationes Biologicae [13(8), and 14(1)]. Offprints. Both are well-illustrated and contain many new species. The Canary Island study is in German, despite the partly Latin title. It has a small private library stamp on the front wrapper, otherwise very good clean copies. Rare.

 Ichneumonides d'Europe et des pays limitrophes; Four parts in one. 514, [2] p., 5 plates, one portrait (double), paperbound (plain covers).
 With keys to the species and detailed descriptions. The plates are on thicker paper. Pagination is double, both of the separate issues, and of the series as a whole. Includes an index referring to the latter page numbers. The two additional unnumbered pages contain the captions to the last plates. The portrait is upside down. It is unclear who's portrait it is. A later (1935) wrapper of an unrelated publication has been used, inside out. The portrait, however, seems to be older. According to Derksen & Scheiding (Horn-Schenkling II), the combined papers were privately published by the author, and more supplements followed. Uncut. Partly unopened. Small private library stamp on the front wrapper, otherwise clean. In all a good copy. Rare. Horn-Schenkling II(1), p. 260.

Rare complete set of a hymenopterological catalogue of all Braconidae from the Palaeartic region known up till then. With good keys and detailed descriptions. The "Ausgabedaten" on the title page verso are not entirely correct (part was published in 1931), as became clear after comparing with a set in original wrappers. The second volume has "Vorwort zum III. Bande", but this is because Band II from the series does not deal with palaeartic species. First few leaves of volume II creased, a few others a bit creased in the outer margin, but in general a good clean set.

The green on spines somewhat discoloured. Some slight scattered foxing, but plates clean. In this set the plates are bound at the end of each volume. Ex library Claude Gouffé.
 This is Comte Amédée Luis Michel Lepeletier de Saint-Fargau's (1770-1845) main work and was published by Librairie Encyclopédique de Roret as part of the "Suites à Buffon". There was a fourth volume published in 1846 which was authored by A. Brullé but is not present in our set, but the work is very rare in any state.  Species des hyménoptères composant le groupe des braconides avec les descriptions de toutes les especes d'Europe et des pays limithrophes en Afrique et en Asie. Enrichi de planches coloriés donnant, d'après nature, outre un ou plusieurs specimens des insectes de chaque genre, de nombreux dessins au trait des caractères utiles à l'intelligence du texte; x, 609 p., unnumbered plate explanations, 18 lithographed plates, of which 14 are hand-coloured. In issues, with printed wrappers.
 Important treatise, with fine illustrations of new and little known species. This is regarded as a part (4) of the "Species des Hyménoptères d'Europe et d'Algérie" edited by J. E. André. André wrote the preface, but it is only casually and ambiguously indicated that this work belongs to the "Species". It seems that two more volumes were published, but this work is complete in itself. The author's name is mis-spelled as "Marshal" on the front wrapper and title page; however, he is Thomas Ansell Marshall (1827-1903) who wrote the "Monograph of the British Braconidae". Wrappers much frayed (especially the blank rear wrapper) due to paper quality, text and plates, however, quite good. Rare. Nissen ZBI, 114.

Die Grabwespen des Herzogthums Nassau [AND] Die Bienen des Herzogthums Nassau; Two volumes in two. 419, 343 p., 2 lithographed plates, uniform contemporary half calf over marbled boards. Spines with gilt title and ornaments.

Adolph Schenck wrote many different monographs on the insects of Nassau, in western Germany. These two hymenopterological monographs are offprints from the society's Jahrbücher 12 and 14, with separate pagination. In the rear of the bee-paper is a smaller one, by the same author, titled "Die Honingbiene vom Hymettus" (3 p.). The first volume with some scattered foxing, the second with the front hinge much rubbed, both volumes somewhat browned due to the quality of the paper. In all a very good set. Catalogue of hymenopterous insects in the collection of the British Museum. Parts I-VII (complete); Seven parts in three. 1254 p., 41 plates, small 8vo, contemporary uniform grained half calf. Gilt title on spines.
With descriptions of new species. It is from the series edited by John Edward Gray and aimed at providing a complete catalogue of the Museum's holdings. The set is as follows: I. Andrenidae and Apidae (1853) 197 p., 6 plates, II. Apidae [continued] (1854) pp. [198]-465, 6 plates, III. Mutillidae and Pompilidae (1855) 206 p., 5 plates, IV. Sphegidae, Larridae, and Crabronidae (1856) pp. [207]-497, 6 plates, V. Vespidae (1857) 147 p., 6 plates, VI. Formicidae (1858) 216 p., 14 plates, VII. Dorylidae and Thynnidae (1859) 76 p., 3 plates. The present set should not be confused with F. Walker's list of hymenopterous insects in the collection of the British Museum, which preceded this work. An average (working) copy at best, as the bindings are crudely taped, some boards detached and show signs of worming (in need of rebinding) and most plates are foxed, paper generally a bit age-toned. EH27762 STITZ, H. & O. SCHMIEDEKNECHT, 1914. €36,00

Die Insekten Mitteleuropas insbesondere Deutschlands. Hymenopteren. Band II. Die Ameisen. Die Schlupf- und Brackwespen; viii, 256 p., 5 full colour plates, numerous text figures, original printed cloth.

This is the second (but first published) volume of the Insekten Mittel-Europas insbesondere Deutschlands (Hymenopteren) edited by C. Schröder. Volume I appeared 14 years later. A third volume was added but the series was never completed. For the groups covered, however, this volume is complete. Stitz wrote the part on ants and Schmiedeknecht dealt with the wasps. Both contain fine text illustrations of taxonomically important parts and nice full colour illustrations of adult specimens. Light spotting to the board margins, otherwise a near mint copy.

 Exotic butterflies. [AND] Exotic moths [AND] Exotic Homoptera [AND] Arachnida. British Spiders. London, The British Museum of Natural History; Four parts in four. loose-leaved (14.0 x 9.0 cm), each with one text leaf, and five full colour (post)cards, and one pictorial envelope.
 In 1922, the British Museum (Natural History) started issuing a series of postcard and greetingcard sets; in the early years usually consisting of five full-colour cards relating to one zoological subject, and some descriptive text. This series was continued at least to the year 2003, when the 299th set was published (for a complete list, see <http://www.nhm.ac.uk/research-curation/library/archives/catalogue/>). Because of the ephemeral character of these attractive and scientifically correct illustrations, these early cards have become quite rare. Of the Exotic Butterflies, the envelope is present. The other two sets are without envelope, and preserved in transparent maps. All cards are nice and clean.

 Collection of 28 papers on Lepidoptera by Aubert; ca. 400 p., many illustrations, green cloth with gilt title on spine. This chronological convolute of publications by the French lepidopterologist Jacques-François Aubert contains some quite ephemeral papers, including some typed and hand-written notes. Strangely enough it includes also one paper on bats (the 29th paper). This was his own personal set, as some receipts for the delivery of offprints are included as well. Spine sunned, otherwise very good and nicely bound. A unique item.

 The Lepidoptera of the British Islands. A descriptive account of the families, genera, and species indigenous to Great Britain and Ireland, their preparatory states, habits and localities. Vol. 9. Heterocera. Geometrina-Pyralidina; 454 pp., 48 (377-424) hand-coloured plates, large 8vo, publisher's brown cloth with gilt vignette on front board and gilt title on spine.
 Part of a massive work published in an illustrated (large 8vo) and a non-illustrated (8vo) edition. This is a complete part of the large paper edition with hand-coloured illustrations, in a fine state. Both versions are rare. This part deals with several families, including the Larentidae, Pyraustidae and Pyralidae. A few light pencil annotations in the text, plates clean. A very good copy of one of the rarer parts of the series. Nissen ZBI, 236.

 Catalogue of the Type Specimens of Microlepidoptera in the British Museum (Natural History) Described By Edward Meyrick. Volume I; 332 p., 4 plates, 1 portrait (of Meyrick), blue cloth with gilt title on spine (plain dust jacket).
 This is the important first volume (of 8). It contains a historical introduction, labels, arrangement, classification, illustrations, and a catalogue of species. Preface by N.D. Riley, keeper of entomology. In very good condition, as new.
- EL27097 **CLARKE, J.F.G., 1965**. €22,00
 Catalogue of the Microlepidoptera in the British Museum (Natural History) described by E. Meyrick. Vol. 5: Timyridae to Scythridae; 581 p., 283 plates, blue embossed cloth with gilt title on spine, printed dust jacket.
 This is volume 5 in a series of eight, compiled by the microlepidopterologist John Frederick Gates Clarke (1905-1990). However, it is complete in itself regarding the groups treated, viz. Timyridae, Hyponomeunidae, Ethmiidae, Metachandidae, Cosmopteridae, Walshidae, Blastodacnidae, Scythridae. The word "catalogue" does not quite cover the contents: "illustrated taxonomical handbook" would be more appropriate. A fine clean, "as new" copy.

 This beautiful facsimile edition of one of the rarest lepidopterological works, written and illustrated by Carl Alexander Clerck (1709-1765), a close friend of Linnaeus. This edition is divided in two parts: the first deals with the background of the author, his publications and his collections, providing many new and interesting facts. It also contains a facsimile reproduction of the copy owned by Queen Louise Ulrica. The second part contains a complete facsimile edition of the published work. Only 990 (numbered) copies were printed of which this is number 278. A mint copy, as new (in its original slipcase).

- EL27110 **CORBET, A.S. & H.M. PENDLEBURY, 1956 (2ND ED.).** €32,00
 The butterflies of the Malay Peninsula. Second edition revised by A. Steven Corbet and edited by N. D. Riley; x, 537 p., 55 plates including the frontispiece (of which eight in full colour), original green cloth with gilt title on the spine and gilt vignette on the front board.
 The first edition was published in 1934 and this is the second, much enlarged edition with many new data and corrections to the systematical parts. The work is still very useful in identifying the varied and often spectacularly coloured species from the Malayan region once studied by Wallace and Distant. Plate 2-21 show the genitalia of 342 different species, and the wings of 322 different specimens are shown on the black and white plates. Armorial bookplate of H. Hamilton Beamish on the front pastedown, free endpapers and title page very slightly spotted, otherwise a very good clean copy.

 Die Schmetterlinge in abbildungen nach der natur mit Beschreibungen. Erster Teils zweiter Band welcher die Fortsetzungen der Tagschmetterlinge. Vierter Theil. Der Nachtschmetterlinge dritter Phalanx oder Horde. Noctuae, Eulenphalenen. Nachteulen. Eulen / Die ausländischen Schmetterlinge in Abbildungen; 3 volumes. [1], 190, title-page, 420 (of 698) / (no title-page), 192 (of 254) p., 43, 107 (+ 20B, 26B, 38A, 46B & 46C) / 46 hand-coloured engraved pls, 4to, contemporary half, spine gilt with orange and green labels (last volume with a 3 cm silver stain on cover). Volume 1(2) with a waterstain in inner margin on pages 85-100. Volume 4(1) with a similar waterstain in first 6 pages, Most of the plates depicting European species have one or more figures to which French and Latin names are neatly written in an "old hand" (see photograph). About 5 plates have some foxing, the remaining plates are clean.
 This is one of the rarest and most beautiful work on Lepidoptera. It is difficult to collate, and complete copies of the first edition are extremely rare (even the British Museum catalogue shows an incomplete copy). We have 155 (of 441) col. plates, and another 46 (of 63) col. plates of the non European species, which are bound, together with most of the text, in the last volume. The last work "ausländischen Schmetterlinge" was published between 1785 and 1801, and is seldom offered for sale. This set probably belonged to Leon Arthur Joseph Arnois de Captot (1818-1899). We found a slip bearing his name and with the address: Chateau de Camp-Héroult par Bourgheroulde (Eure), Normandie. The handwritten captions on the plates, and a few loosely inserted pages of notes, could be his as well.

Catalogue of the collection of palaeartic butterflies formed by the late John Henry Leech and presented to the trustees of the British Museum by his mother, Mrs. Eliza Leech; vi, 228 p., [1] p., 2 coloured plates, one portrait as a frontispiece, 4to, original (?) blind-tooled cloth with gilt title on spine.

John Henry Leech (1862-1900) was a British entomologist who, inspired by Henry Bates, went to Brazil, but also visited Morocco, the Canary Islands, and Madeira, and later went on a zoological expedition to Korea, Japan, China, and the Himalayas. On return he wrote "Butterflies from China, Japan, and Corea". His collection of 18.000 specimens also contained material collected by others and is now in the Natural History Museum (BMNH) in London. The work lists name, sex and localities. With bookplate pasted in on front. The paper is age-toned. Rear hinge bottom taped, 2 pages with repaired tear. The two chromolithographed plates are on much better paper, and in good condition. Very rare. Cat. BM(NH) 7, p. 615; not in Nissen, ZBI.

Die Schmetterlinge Europas; Three volumes in three. 1044 p., 353 text figures; 95 chromolithographed plates, 4to, Uniform new, grey cloth with original Jugendstil pictorial front covers laid on, and black morocco labels with gilt titles on spines.

This is the third and final and best edition of Hofmann's work "Die Grossschmetterlinge Europas", with all the fine coloured lithographed plates, reworked by Arnold Spuler. The various families were treated by several experts, e.g. Geometridae by H. Rebel, and Tortricidae by J. von Kennel. This set is complete for the butterflies. The numbering on spine labels of volumes I and III is reversed, otherwise a good clean set. Nissen ZBI, 1973a.

EL27748 **STAMM, K. (ED.), 1981-2007.** €230,00

Die Lepidopterenfauna der Rheinlande und Westfalens. Prodrömus. Volumes 1-13; 14 volumes in 14. Over 2000 p., 141 full colour plates, paperbound. Arbeitsgemeinschaft rheinisch-westfälischer Lepidopterologen.

A privately printed, local faunal description by several different authors, with many hundreds of clear macro-photos of butterflies and moths including many that are seldom figured. This set includes the initial, unnumbered part, which was privately published by Karl Stamm, with the slightly different title and subject, "Prodrömus der Lepidopteren-Fauna der Rheinlande und Westfalens". A continuous run, from the start, such as this one is now rare. After 2007, four more volumes were published. Several volumes in this run (2-4, 12) are now out of print. Tiny previous owner's stamp on most front covers and top margin of title pages. Otherwise a very good set.

Handbuch der paläarktischen Gross-Schmetterlinge für Forscher und Sammler. Zweite gänzlich umgearbeitet und durch Studien zur Descendenztheorie erweiterte Auflage des Handbuches für Sammler der europäischen Gross-Schmetterlinge; xii, 392 p., 8 fine chromolithographed plates. Contemporary embossed cloth with gilt title on spine.

Although considered by the author as the second edition of his "Handbuch für Sammler der europäischen Grossschmetterlinge" (1891), this work has little to do with the former, being twice as large, twice as thick, with eight full plates where the "first" edition had none and much more and more in-depth information on the ontogeny, phylogeny, zoogeography, and behaviour of the Lepidoptera. Many of the taxa illustrated were described by the author. An attractive and unusually fine, clean copy.

Catalog der Lepidopteren des palaearktischen Faunengebietes. Dritte Auflage des Cataloges der Lepidopteren des europäischen Faunengebietes; Two parts in one. xxxii, 777 p, portrait, contemporary half morocco over marbled boards. Gilt title on spine.

The work is issued in two parts which, it seems, are always found combined. Part I (xxxii, 411 pp.) deals with Papilionidae to Hepialidae, part II with Pyralidae to Micropterygidae (368 pp.). As usual a bit foxed but this is a special copy with annotations including new species of the Alpes Maritimes (France) in blue which have been described by Millière in his "catalogue rais. des Lépidoptères des Alpes Maritimes" and where new species or varieties are indicated in red. It includes a very large index.

 Zeitschrift des Vereines der Naturbeobachter und Sammler. Volumes 1-9; Text with 26 mostly coloured plates. In contemporary paper portfolio, and in three blue wrappers with script title on the spines.
 Deals only with Entomology, and principally Lepidoptera. Collation is difficult; several errors were made in dating and numbering the issues. The start was in cyclostat, with two "volumes 1", in 1924-1925 and 1926. Only from 1926 onwards, the work was printed, and volume numbering started anew with 1. The plate numbering also started twice with "1"; and some plate numbers are used three times, whereas others are either never used, or lacking here. Offered are two sets, which only partly overlap. Rare.

- EL27812 **TUTT, J.W., 1906.** €50,00
 A natural history of the British Lepidoptera. A text book for students and collectors. Volume VIII; iv, 479 p. 15 plates, original red ruled cloth. Spine with gilt title.
 Part of a series by James William Tutt (1858-1911). Horn-Schenkling lists only eight volumes (but there are at least 11). This part deals with general subjects, mainly on the larvae, and the taxonomy of the *Urbicolidae*, *Cyclopididae*, *Hesperiidae*, *Ruralidae*. The plate order is chaotic, probably because this part was published "out of order". Joints weak, cloth binding split at hinges. Otherwise a very good copy. Horn-Schenkling serie II, part IV, p. 306.
- EL27813 **TUTT, J.W., 1907-1908.** €50,00
 A natural history of the British Lepidoptera. A text book for students and collectors. Volume IX; x, 495 p. 28 plates, original red cloth. Spine with gilt title.
 On the title page is printed: Vol. II [sic!]. Part of a series by James William Tutt (1858-1911). Horn-Schenkling lists only eight volumes (but there are at least 11). This volume deals mainly with *Ruralidae*, *Ruralinae* and *Theclinae* but also includes chapters on, for example, the various habits of butterfly larvae. The plate order is chaotic but is as requested by the "notice to binder" on p. 495. Top end of backstrip frayed, spine sunned. Otherwise a good copy. Horn-Schenkling II, part IV, p. 306.

The sucking lice; ix, 320 p., 124 text figures, blue buckram with gilt title on the spine.
Written by the American entomologist Gordon Floyd Ferris (1893-1958), professor of entomology at Stanford University, California, and with the collaboration of Chester J. Stojanovich. With detailed descriptions and illustrations, including those of new species. Two things may be extra noteworthy. First, the motto, lifted from a work by Denny (1842): "In the progress of this work, however, the author had to contend with repeated rebukes from his friends for entering upon the illustration of a tribe of insects whose very name was sufficient to create feelings of disgust", and two: the chapters on the pediculi ascribed to man. The latter alone is worth buying the volume. Library stamp on front paste-down, otherwise a good copy.

 Catalogue of Orthopterous Insects in the Collection of the British Museum. Part I. Phasmidae; 195 p., 40 plates. roy. 4to, new hcloth. The first few pages have some browning in lower blank margin, the plates are crisp and spotless. Library stamp on verso title-page. The later 8 supplemental plates are lacking in this copy.
 "The most important and extensive publication of the 19th century dealing with Phasmidae is undoubtedly John Obadiah Westwood's Catalogue of Orthopterous Insects in the Collection of the British Museum which already listed 39 genera, comprising 471 species in two main groups. Many species were described for the first time and especially the very detailed descriptions and excellent black and white plates showing a wide range of species make it remain an invaluable work for the identification of phasmids."
